## OBJECTIVE

Computer Science undergraduate with hands-on experience building AI-powered workflow automation using n8n, Python, and REST APIs — integrating LLMs, enrichment APIs, and CRM/notification tools into production-grade GTM, growth, and product pipelines. Seeking Automation Engineer / GTM & Product roles where AI-driven automation is core to the job.

## EDUCATION

|                                                                                                 |                                 |
|-------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Pranveer Singh Institute of Technology, Kanpur</b><br>B.Tech in Computer Science Engineering | Oct 2023 – Present<br>CGPA: 7.9 |
| <b>The Pillars Public School, Gorakhpur</b><br>Class X & XII (CBSE)                             | 2020 – 2023                     |

## SKILLS

**Programming Languages:** Python, Java  
**Workflow & Process Automation:** n8n, REST API Integrations, Webhooks, LLM-based Data Parsing (OpenAI/OpenRouter/Claude), Google Calendar & Sheets API, Slack API  
**GTM & Growth Tooling:** Clay, Apollo.io, Airtable, Typeform, Segment/Mixpanel-style event scoring  
**QA & Test Automation:** Selenium, Python Automation Scripts, Postman, API & Manual Testing  
**Backend & Tools:** FastAPI, Spring Boot, REST APIs, JWT Authentication, Git, GitHub, Docker  
**Databases:** MySQL, PostgreSQL  
**Certifications:** HackerRank Python (Basic) Skills Certification
